

POLYICE AFL 36

DESCRIPTION

High concentration de-icing liquid additive for roads. POLYICE AFL 36 is a highly concentrated ready-to-use de-icing additive, its partially emulsifiable formulation allows an extensive contact surface, high adhesion and stability on the road surface, extending the life and effectiveness of the additive. POLYICE AFL 36 is simply sprayed on the road surface.

APPLICATION

POLYICE AFL 36 can be used on any type of road.

DIRECTIONS OF USE

POLYICE AFL 36 is ready for use to be uniformly sprayed on the road surface by tank trucks equipped with a spraying system.

DOSAGE

The dosage of POLYICE AFL 36 varies according to traffic and environmental conditions, already with 3/5 g / m² it begins to perform an effective defrosting and protective action.

STORAGE

POLYICE AFL 36 can be stored for 24 months in its original closed packaging, at a temperature between 5 ° C and 30 ° C. Depending on the storage temperature, the product can vary viscosity, however its characteristics are not compromised.

SAFETY

For more information on classification, protective measures and measures in case of fire, please refer to the product safety data sheet, available on request.

WARNINGS
